

Leaning into the Future of Work: Lessons in Leadership from a NASA Astronaut

IACBE + FRANKLIN UNIVERSITY

THURSDAY, FEBRUARY 25
@ 12 P.M. EST

Col. Douglas Wheelock's experience with interacting with our civilization's most advanced technologies and in leading successful space missions is legendary. In this time of extraordinary disruption and transformation of every aspect of society, his insights will help both leaders and educators prepare for the future and to develop the competencies that enable others to thrive in a VUCA (volatile, uncertain, complex, and ambiguous) future.
